

Combining market leading GPS satellite tracking technology with starter interrupt solutions expertise

PassTrax is the latest addition to the PassTime family of starter interrupt solution providing dealerships and finance companies the broadest choice of solutions, ensuring PassTime customers get the right solution for their needs.

PassTrax utilizes the Cellemetry Global Positioning System (GPS) which boasts the best coverage of the continental United States, providing dealerships and finance companies the broadest geographical coverage to track down truant customers.

PassTrax's GPS solutions provides dealerships and finance companies the ability to pool their hits, enabling system operators to save money by only using hits on the vehicle that matter.

PassTrax also saves the dealership money by starting the unit's annual airtime contract at the time of installation, compared to other GPS based products which start their annual contract the moment a unit ships from the factory.

- Largest geographical coverage
- Real time GPS satellite tracking
- State boundary notification
- Pooled hits minimize the tracking costs for dealerships and finance companies
- Dealerships and finance companies can save their hits for the accounts that matter
- Airtime only starts at time of installation
- May reduce lot and customer insurance
- 24 hour emergency phone support
- 1 year unlimited warranty
