

PassTime helps you make more money by maximizing collections and reducing repossessions.

PowerPay is the next-generation starter-interrupt system from Passtime that uses wireless link technology to provide you with the ability to disable a car remotely - anytime, anywhere.

With a host of advanced and easy-to-use features, PowerPay gives dealers the ultimate in control. PowerPay frees up time now spent on account administration so more time can be spent growing your business. In addition, PowerPay's turn-key system helps BHPH dealers function more profitably as an effective financing operation.

When all is said and done, PowerPay by PassTime Leaves competitor devices in the rear view mirror.
