

On demand wireless protection from payment delinquencies

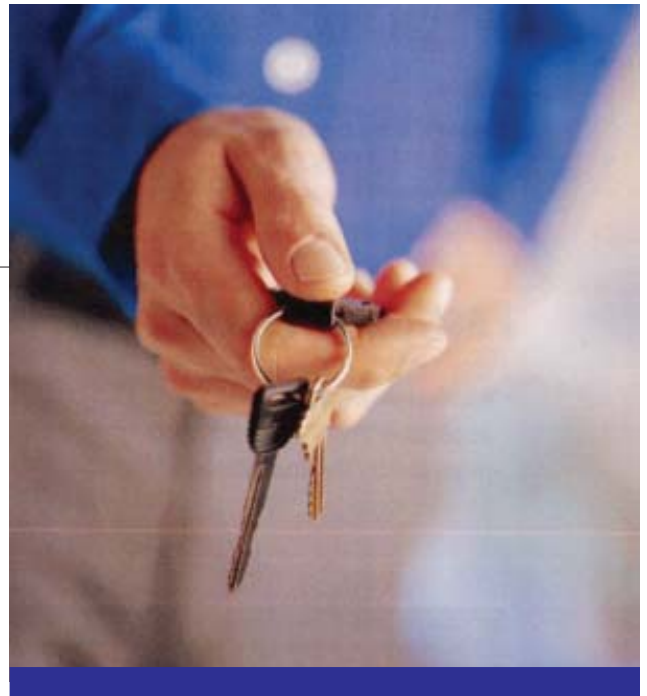

No inconvenience for your reliable customers

PowerPay Junior™ is the next-generation starter-interrupt system from PassTime™ that uses wireless link technology to provide you with the ability to disable a car remotely- anytime, anywhere.

PowerPay Junior™ provides lenders and dealers the ability to immobilize a vehicle remotely on demand. PowerPay Junior™ allows operators to selectively disable customers who are in default.

Additional features include a backup system that other competing products cannot match. If a customer becomes disabled in an area that lacks wireless coverage, PowerPay Junior™ is programmed to accept manual codes using a PassTime™ remote which is provided free of charge with the unit.

PowerPay Junior™ includes the PassTime™ emergency code feature, should a customer become disabled and need immediate usage of the vehicle.

- *Wireless coverage provided by Verizon Wireless™*
- *Designed to disable defaulting customers*
- *Web based interface*
- *Back-up infra-red control*
- *Adjustable warning periods*
- *3 year unlimited warranty*
